Working all the day at the Museum

Satu Qala Tell

- Satu qala is located approximately 70 km southeast of Erbil and 25 km south of koya.
- The valley in which the site is located is relatively flat and drained in part by a wadi running west of the site.
- The site on the right bank of the lower zab, between the towns of Dukan and Taq Taq.

Excavation in the Tell Satu Qala

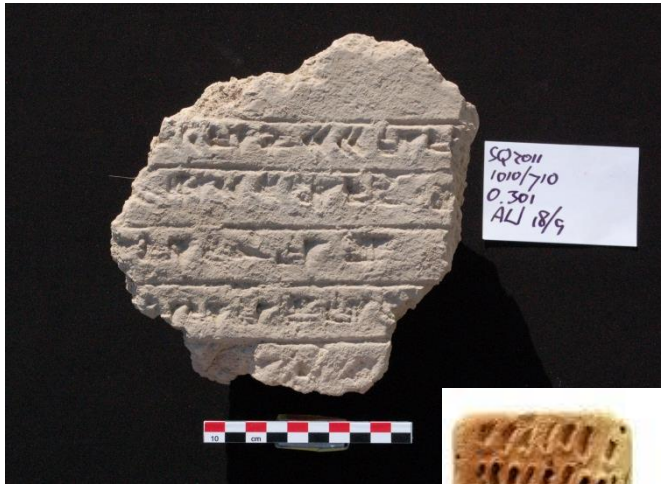

Operation A

- The fieldwork on the northwestern slope of the mound's summit during the first two seasons.
- Aimed to explore the sequence of occupational phases of the site. In 2010 excavations were carried out in the southern half of square 1010/690.

Collection from the Excavation of Tell Satu Qala

Glazed Brick SQ 10-6
(Measurements : 25.5
19.0 8.0 cm).

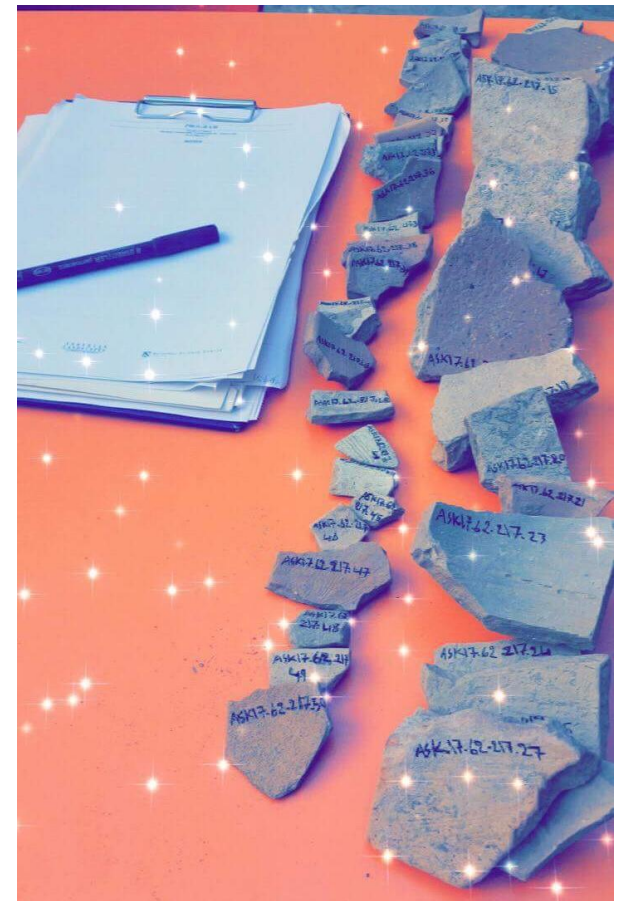

Work at the Tomb

Archaeology Survey Koya (ASK-2016-2017)

In September 2016 I took part to the Archaeological Survey of Koya Project (University of Innsbruck, Austria) in Koya (Erbil, Iraq) as a pottery specialist.
